

Advocacy, policy and support on male sexualities

The end of the beginning

*Key issues in addressing HIV prevention,
impact mitigation and treatment and
support for males who have sex with
males in India*

Kim Mulji
Executive Director

Established interventions

HIV prevention

Scaling up:

- What model do we use to achieve coverage across India?
- What are the financial and other resource implications?
- What are the policy implications?
- What about sustainability?

Impact mitigation

- Changing government, both national and local policy
- Changing social attitudes to sexuality and HIV infection
- Ensuring appropriate prevention, treatment and care services are in place

Treatment and care

- Ensuring access to appropriate HIV, viral load and other tests, antiretroviral and other drugs, treatments and medical advice and for males who have sex with males
- Ensuring males who have sex with males know about services and feel happy about accessing them
- Developing models of care and support for HIV infected males who have sex with males, their partners and families, and providing services
